

****AWS Cloud Practitioner Preparatory Exam Answers:****

1. ****Which AWS service or tool should a company use to centrally request and track service limit increases?****

- Service Quotas

2. ****Which of the following are components of an AWS Site-to-Site VPN connection? (Choose two.)****

- Virtual private gateway
- Customer gateway

3. ****Which of the following are benefits of migrating to the AWS Cloud? (Choose two.)****

- Operational resilience
- Business agility

4. ****Which AWS service or feature allows users to connect with and deploy AWS services programmatically?****

- AWS software development kits (SDKs)

5. ****A user needs to determine whether an Amazon EC2 instance's security groups were modified in the last month. How can the user see if a change was made?****

- Use AWS CloudTrail to see if the security group was changed.

6. ****A company has a single Amazon EC2 instance. The company wants to adopt a highly available architecture. What can the company do to meet this requirement?****

- Scale horizontally across multiple Availability Zones.

7. ****Which documentation does AWS Artifact provide?****

- AWS ISO certifications

8. ****What are some advantages of using Amazon EC2 instances to host applications in the AWS Cloud instead of on premises? (Choose two.)****

- EC2 integrates with Amazon VPC, AWS CloudTrail, and AWS Identity and Access Management (IAM).
- EC2 has a flexible, pay-as-you-go pricing model.

9. ****Which AWS service or feature acts as a firewall for Amazon EC2 instances? ****

- Security group

10. ****Which AWS service or feature can a company use to determine which business unit is using specific AWS resources?****

- Cost allocation tags

11. **A company is planning to replace its physical on-premises compute servers with AWS serverless compute services. The company wants to be able to take advantage of advanced technologies quickly after the migration. Which pillar of the AWS Well-Architected Framework does this plan represent?**

- Performance efficiency

12. **A company needs to simultaneously process hundreds of requests from different users. Which combination of AWS services should the company use to build an operationally efficient solution?**

- Amazon Simple Queue Service (Amazon SQS) and AWS Lambda

13. **A company wants to limit its employees' AWS access to a portfolio of predefined AWS resources. Which AWS solution should the company use to meet this requirement?**

- AWS Service Catalog

14. **A company wants to migrate its workloads to AWS, but it lacks expertise in AWS Cloud computing. Which AWS service or feature will help the company with its migration?**

- AWS Consulting Partners

15. **Which duties are the responsibility of a company that is using AWS Lambda? (Choose two.)**

- Security inside of code
- Writing and updating of code

16. **Which pillar of the AWS Well-Architected Framework refers to the ability of a system to recover from infrastructure or service disruptions and dynamically acquire computing resources to meet demand?**

- Reliability

17. **A company needs to establish a connection between two VPCs. The VPCs are located in two different AWS Regions. The company wants to use the existing infrastructure of the VPCs for this connection. Which AWS service or feature can be used to establish this connection?**

- VPC peering

18. **Which of the following are included in AWS Enterprise Support? (Choose two.)**

- AWS technical account manager (TAM)
- 5-minute response time for critical issues

19. **Which task requires using AWS account root user credentials?**

- Changing the AWS Support plan

20. **How does the AWS Cloud pricing model differ from the traditional on-

premises storage pricing model?**

- There are no upfront cost commitments

21. **According to the AWS shared responsibility model, what responsibility does a customer have when using Amazon RDS to host a database?**

- Manage connections to the database

22. **What is the scope of a VPC within the AWS network?**

- A VPC can span all Availability Zones within an AWS Region.

23. **A global media company uses AWS Organizations to manage multiple AWS accounts. Which AWS service or feature can the company use to limit the access to AWS services for member accounts?**

- Service control policies (SCPs)

24. **A user is comparing purchase options for an application that runs on Amazon EC2 and Amazon RDS. The application cannot sustain any interruption. The application experiences a predictable amount of usage, including some seasonal spikes that last only a few weeks at a time. It is not possible to modify the application. Which purchase option meets these requirements MOST cost-effectively?**

- Buy Reserved Instances for the predicted amount of usage throughout the year. Allow any seasonal usage to run at an On-Demand rate.

25. **A company is launching an ecommerce application that must always be available. The application will run on Amazon EC2 instances continuously for the next 12 months. What is the MOST cost-effective instance purchasing option that meets these requirements?**

- Savings Plans

26. **A company's on-premises application deployment cycle was 3-4 weeks. After migrating to the AWS Cloud, the company can deploy the application in 2-3 days. Which benefit has this company experienced by moving to the AWS Cloud?**

- Agility

27. **Which AWS services or features provide disaster recovery solutions for Amazon EC2 instances? (Choose two.)**

- Amazon Elastic Block Store (Amazon EBS) snapshots
- EC2 Amazon Machine Images (AMIs)

28. **A company is planning to run a global marketing application in the AWS Cloud. The application will feature videos that can be viewed by users. The company must ensure that all users can view these videos with low latency. Which AWS service should the company use to meet this requirement?**

- Amazon CloudFront

29. **Which component of the AWS global infrastructure is made up of one or more discrete data centers that have redundant power, networking, and connectivity?**

- Availability Zone

30. **Which AWS service will help protect applications running on AWS from DDoS attacks?**

- AWS Shield

31. **A company plans to create a data lake that uses Amazon S3. Which factor will have the MOST effect on cost?**

- The selection of S3 storage tiers

32. **A company wants to migrate a critical application to AWS. The application has a short runtime. The application is invoked by changes in data or by shifts in system state. The company needs a compute solution that maximizes operational efficiency and minimizes the cost of running the application. Which AWS solution should the company use to meet these requirements?**

- AWS Lambda

33. **A large company has multiple departments. Each department has its own AWS account. Each department has purchased Amazon EC2 Reserved Instances. Some departments do not use all the Reserved Instances that they purchased, and other departments need more Reserved Instances than they purchased. The company needs to manage the AWS accounts for all the departments so that the departments can share the Reserved Instances. Which AWS service or tool should the company use to meet these requirements?**

- AWS Organizations

34. **A company wants to review its monthly costs of using Amazon EC2 and Amazon RDS for the past year. Which AWS service or tool provides this information?**

- Cost Explorer

35. **A company is migrating to the AWS Cloud instead of running its infrastructure on premises. Which of the following are advantages of this migration? (Choose two.)**

- Increased global reach and agility
- Ability to deploy globally in minutes
